

LD BRAIN — KNOWLEDGE CAPTURE

Dilip Ji

LD Group — Finance & Accounts

PREPARED BY	Mahesh Gavhane — LD Brain Build Team
DATE	April 2026
ESTIMATED TIME	45–60 minutes

GAPS CLOSED BY THIS QUESTIONNAIRE

G1, G2, S12, S18, C1, C2, C3, C7, L4, L5, V4

Why this questionnaire? The LD Brain is the group's central intelligence system. The financial layer — cash, P&L, cost structure, and inter-company flows — is the most critical missing piece. Without it, the brain can see revenue but not profitability. Your answers here are the foundation for every financial decision the group makes. Even rough numbers unlock most of the analysis.

Gaps this closes: G1, G2, S12, S18, C1, C2, C3, C7, L4, L5, V4

SECTION A — GROUP CASH AND DAILY DASHBOARD

The Group Cash Dashboard was agreed as Priority #1. Phase 1 (manual Google Sheet by 9am daily) has not started yet.

A1. Current cash position across all companies Right now, today — what is the approximate cash position for each entity?

- LD Silk Mills: ₹ ____ (all bank accounts combined)
- Linkd Prints: ₹ ____
- LD Cotton Mills: ₹ ____
- Vhagar: ₹ ____
- Group total: ₹ ____

A2. Receivables and payables

- What is the total outstanding receivable across Silk right now? (₹ owed to us by customers)
- Who are the top 3 customers by outstanding amount? What are they owed?
- What is the total payable — what do we owe to mills/suppliers in the next 30 days?
- Are there any receivables that are 90+ days old and at risk? What's the ₹ and customer name?

A3. Cash dashboard Phase 1 — blocker? The plan is a simple Google Sheet filled by 9am every morning with 5 lines. What is stopping this from starting this week? Is it:

- No time to set it up?
- Unclear who fills which company's number?
- Bank login access issues?
- Something else?

What is needed to start Phase 1 this Monday?

SECTION B — P&L STRUCTURE (MONTHLY, PER ENTITY)

We need one month's P&L for each entity to anchor the brain. Even rough numbers are fine.

B1. LD Silk Mills — last full month

- Gross revenue (billing): ₹ ____

- Returns: ₹ _____
- Net revenue: ₹ _____
- Cost of goods (fabric procurement that month): ₹ _____
- Gross profit: ₹ _____
- Fixed operating costs (rent, salaries, utilities): ₹ _____ per month
- Net operating profit: ₹ _____

B2. Linkd Prints — last full month

- Gross billing: ₹ _____
- Cost of production (paper, ink, consumables): ₹ _____
- Labour (all Linkd salaries): ₹ _____ per month
- Rent + utilities: ₹ _____ per month
- Net operating profit: ₹ _____

B3. LD Cotton Mills — last full month

- Gross billing: ₹ _____
- Cost of fabric used: ₹ _____
- Labour cost (42 employees): ₹ _____ per month
- Rent + utilities: ₹ _____ per month
- Net operating profit (or loss): ₹ _____
- At current utilization, is Cotton cash-flow positive or negative?

B4. Vhagar — last full month

- Gross GMV: ₹ _____
- Returns: ₹ _____
- Net revenue: ₹ _____
- Cost of goods: ₹ _____
- Marketing spend: ₹ _____
- Agency fees: ₹ _____
- Net operating profit (or loss): ₹ _____

SECTION C — COTTON COSTS (CRITICAL — CERT BLOCKERS + UNIT ECONOMICS)

C1. Cost per garment — Cotton For each of Cotton's three manufacturing tiers:

Mass production (basic garments for volume):

- Average fabric cost per piece: ₹ _____
- Cutting, stitching, finishing labour per piece: ₹ _____

- Overheads allocated per piece: ₹ ____
- Total COGS per piece: ₹ ____
- What is Cotton billing per piece to Vhagar currently?

Mid-tier (structured garments, quality fabrics):

- Same breakdown: fabric / labour / overhead / total COGS per piece?
- What is the minimum billing rate per piece where Cotton makes money?

Export-grade (if Cotton ever pursues export):

- What would COGS look like for export-spec garments?

C2. Fixed cost burn at Cotton

- What is the total monthly fixed cost at Cotton (rent + salaries + utilities + loan EMIs if any)?
- At current utilization (rough estimate), is Cotton breaking even?
- At what utilization % does Cotton reach break-even?
- How many months of fixed costs can Cotton sustain if orders dry up?

C3. External customers at Cotton

- Other than Vhagar, does Cotton have any paying external customers right now?
- If yes: who are they, what do they order, and at what rate?
- What is the total external billing from Cotton per month?

SECTION D — COTTON CERTIFICATIONS (CRITICAL PATH)

D1. Current status of each cert The brain shows all certifications as "NOT STARTED" as of April 2026.

- ISO 9001: Have you contacted a certifying body? If yes, who and what did they say? If no, what is blocking the call?
- OEKO-TEX: Same — contacted anyone? What is the current status?
- Have you got any quotations for certification costs?
- Do you have a quality manual or documented processes that ISO 9001 requires?

D2. Timeline and blocking issues

- ISO 9001 is supposed to take 60–90 days from kickoff. When is kickoff?
- Is there a specific thing blocking you from starting today? (Cost? Documentation? Awareness of process?)
- Is there a consultant or agency you would trust to guide Cotton through the ISO process?
- Are there any buyers who have specifically asked for ISO / OEKO-TEX as a requirement?

SECTION E — INTER-COMPANY RATES (AUDIT)

E1. Silk ↔ Linkd rate The brain shows Silk is charged ₹36.75/mtr for Linkd printing. This is Book A (captive).

- Is ₹36.75 a formally decided rate? Is it documented in any agreement?
- Does this rate cover Linkd's direct costs (paper, ink, labour) with any margin?
- When was this rate last reviewed?
- Should it change? If yes, to what, and what is the trigger?

E2. Cotton ↔ Linkd rate Cotton is currently charged ₹35–40/mtr. The external market rate for the same service is ₹28/mtr.

- Why is Cotton paying above market? Was this intentional?
- Is Cotton aware they are paying above market?
- What should this rate be corrected to, and when?

E3. Silk → Cotton inter-company fabric supply

- When Silk sells fabric to Cotton, what is the transfer price?
- Is it at Silk's cost price, at a margin, or at market price?
- Is there a formal inter-company agreement for this?

SECTION F — SILK PAYMENT HEALTH (90+ DAY DEBTORS)

F1. Overdue receivables

- From Silk's AR ledger: what is the total outstanding beyond 90 days?
- Who are the top 5 customers by overdue amount?
- Have any of these been flagged as potential bad debt?
- What is the current policy on chasing overdue accounts — who calls them, and when?
- Are there any customers where the relationship is so sensitive that overdue debt is never pushed?

After answering, please share responses with Mahesh. Answers will be entered into the LD Brain and gaps will be marked closed.
