

LD BRAIN — KNOWLEDGE CAPTURE

Gaurav Ji

LD Silk Mills — Sales Principal

PREPARED BY	Mahesh Gavhane — LD Brain Build Team
DATE	April 2026
ESTIMATED TIME	45–60 minutes

GAPS CLOSED BY THIS QUESTIONNAIRE

S1, S2, S5, S10, S13, S14, C8

Why this questionnaire? The LD Brain is the group's central intelligence system. On the Silk side, the biggest unresolved gap is also the most urgent action: ₹45.94 Cr of revenue shows "UNASSIGNED" in SAB — no salesperson tagged to those accounts. This single fix unlocks 6 downstream analyses. This questionnaire covers that action first, then 6 other gaps only you can close.

Gaps this closes: S1, S2, S5, S10, S13, S14, C8

SECTION A — SP ASSIGNMENT (DO THIS FIRST — UNBLOCKS EVERYTHING)

A1. Top 50 accounts without SP assignment The brain currently shows ₹45.94 Cr (68.4% of total revenue) as "UNASSIGNED" in SAB — no salesperson tagged to any of the major accounts.

- Can you assign a salesperson to each of the top 50 accounts in SAB this week?
- For accounts handled directly by you: assign "Gaurav" as the SP
- For Rinku Bhai's accounts: assign "Rinku Bhai" or the appropriate broker code
- For direct walk-in accounts with no SP: assign "House" or a catch-all code

This single action will unblock the SP net revenue ranking and the relationship ownership map.

A2. Relationship ownership map — top 20 accounts For each of the top 20 Silk accounts by revenue, who is the named human relationship owner?

- Donear Industries (₹6.63 Cr): You personally? A broker? SP?
- Amarson International (₹1.66 Cr): Who?
- PR EXPO TRADELINK (₹6.82 Cr combined): Who controls this relationship? One person or multiple?
- Karani Clothing (₹1.11 Cr): Who?
- Mahendra Ji Knit Wear (₹1.08 Cr): Who?
- Leena Garments, Regent Creation, D.P.Traders (₹60–62L each): Who?

For each: name, phone number, how often you / they call, and "if they stopped buying tomorrow — would we know why?"

SECTION B — CHUR TEXTILES (URGENT — ₹5.7 CR CHURN)

B1. What happened? Chur Textiles was buying ₹1.9 Cr/year with us. They have done zero in FY 25-26.

- Do you know why they stopped?
- Did they tell you they were switching? Or did they just go quiet?

- Who was managing the Chur Textiles relationship — you, a broker, or an SP?
- Have you or anyone at Silk spoken to Chur Textiles in the last 6 months?
- Which competitor are they buying from now?
- Is there any chance of winning them back? What would it take?

B2. Early warning system After the Chur Textiles situation:

- Are there any other large accounts that have been quiet recently? Who?
- Do you have a gut feel that any other top-20 account is at risk of reducing or stopping?

SECTION C — ONE-AND-DONE CUSTOMER QUALIFICATION

531 Silk customers bought once and never came back. The brain needs to know: which ones are worth chasing, and which were bad fits from the start?

C1. Reactivable vs misfit Of the 531 one-time buyers:

- In your experience, what is the most common reason a new customer buys once and doesn't return?
 - (a) Price — found cheaper elsewhere
 - (b) Quality — they weren't satisfied
 - (c) Range — we didn't have what they needed next time
 - (d) They were just sampling us and went back to their regular supplier
 - (e) They placed one big order for a specific project and don't need fabric regularly
 - (f) We never followed up with them
- Are there specific types of customers (by geography, by product type, by order size) that are more likely to be reactivable?
- What is the minimum order history that makes a customer worth a reactivation call? (e.g., "only worth calling if their first order was >₹50K")

C2. ICP (Ideal Customer Profile) Based on your years of experience:

- What does your best customer look like? (What do they do, where are they located, how often do they buy, how many meters per order?)
- Is there a type of customer you've learned to avoid? (One-time, price-only, high-return, slow payer?)
- Do your best customers have anything in common — industry, location, business type?

SECTION D — BROKER ↔ CUSTOMER MAP

The brain currently shows 220 active brokers but no map of which broker brought which customer.

D1. Key broker relationships For the top 5 brokers (Rinku Bhai, and the next 4):

- Which specific customers did each broker introduce?
- If Rinku Bhai stopped working with us tomorrow — which customers would be at risk?
- Are there customers who were brought by a broker but now deal directly with us?

D2. Broker exclusivity

- Are there customers who have an exclusive relationship with a specific broker? (We can only reach them through that broker)
- Are there customers where the broker relationship is weakening and we should build a direct relationship before the broker moves away?

SECTION E — COTTON SALES INTELLIGENCE

E1. Cotton pipeline Cotton has capacity but needs external customers beyond Vhagar.

- Are you actively pitching Cotton's manufacturing to any external buyers?
- Have you had any serious conversations? If yes, what happened?
- What kind of buyer would be the ideal first external Cotton customer? (Domestic apparel brand? Export agent? Etailer?)

E2. Lost deals and competitive intelligence

- Have you pitched Cotton to any buyer who said no or went to a competitor?
- What was the reason given for not choosing Cotton?
- What are competitors charging per piece for similar garments?
- What certifications are buyers most commonly asking for that Cotton doesn't have yet?

E3. Cotton pricing

- For mass production garments (basic shirts/trousers), what is Cotton charging per piece?
- What do you think the market rate for similar CMT work is?
- Is Cotton's current pricing competitive, above market, or below market?

SECTION F — MILL RELATIONSHIPS (SUPPORTING LAXMIKANT'S CAPTURE PROJECT)

F1. From your side of the relationship Laxmikant manages the buying side. From the sales/customer side:

- Are there mills that also source fabrics from customers — making them both supplier AND customer?

- K.K. DESIGNERS appears as both a top-3 grey supplier AND a high-return customer. What is their actual relationship with LD Silk? Are they a mill, a trader, or something else?
- Are there any conflicts of interest in the mill network you're aware of?

F2. Mill succession (your view)

- Are there mills that you feel are becoming unreliable — late deliveries, quality slippage?
- Are there newer mills you've heard good things about that Laxmikant Ji should look at?

After answering, please share responses with Mahesh. Answers will be entered into the LD Brain and gaps will be marked closed.
